EXPERIENCE

Full Stack Engineer

Mar 2025 – Present

thinkinteraction.in

Remote

- Architected a React microfrontend on a PLM (ENOVIA) dashboard with drag-and-drop, notifications, and search across iframe-isolated widgets.
- Reverse-engineered ENOVIA's undocumented internal APIs via browser DevTools to power custom widget integrations.
- Built scalable APIs with NestJS + TypeScript, integrating automated tests to prevent regressions and improve production reliability.
- Delivered a high-performance Remix frontend (SSR + CSR), improving TTFB and SEO via optimized caching and state management.
- Introduced a monorepo with shared logic packages, streamlining development and accelerating feature rollout.
- Built CI/CD pipelines with GitHub Actions and automated GCP VM deployments via Bash, Docker, and SSH, replacing slow manual releases.

Full Stack Engineer

Jan 2024 – Mar 2025

Stackkaroo

Remote

- Developed full-stack projects across diverse tech stacks (Next.js, MERN, Django-React, Flask-Jinja, PHP) adapting quickly to client requirements.
- Built a WebGI-based 3D jewelry configurator with real-time material, gemstone, and finish customization, boosting engagement and conversions.
- Created a JS-based Fixed Deposit calculator to compare RBI rates and project returns, helping users make better-informed investment decisions.
- Reviewed code, coordinated with developers across projects, and enforced code quality standards to keep delivery consistent and maintainable.
- Built interactive 3D room tours using React Three Fiber, Drei, and Three.js for real estate and interior design clients. [Live](#)

Frontend Developer (Intern)

Aug 2023 – Jan 2024

Stackkaroo

Remote

- Built a custom static website for the ICICI Foundation with rich GSAP motion animations.
- Built a multilingual, location-based tourist-information viewer powered by Strapi and Concrete CMS for streamlined content publishing.
- Collaborated within a cross-functional team, learning agile workflows and shipping features through iterative feedback and code reviews.
- Worked directly with clients to gather requirements and translate them into clear, deliverable product features.

EDUCATION

Dr. Akhilesh Das Gupta Institute of Technology

2022 – 2026

Bachelor of Technology (B.Tech), Information Technology

Delhi, India

SKILLS

Programming: TypeScript, Python, C, Bash

Frameworks: Next.js, NestJS, Remix.js, Redux.js, Three.js, TypeORM, Mongoose, Prisma, Vite, FastAPI, Flask, Django

Tools: Git, Docker, Linux, GCP, AWS, GitHub Actions, MySQL, MongoDB, PostgreSQL

AI: Claude code, Model Context Protocol, Acli rocodev

PROJECTS

ENOVIA Dashboard Widgets – PLM Microfrontend Integration

- Integrated React apps as independent widgets into ENOVIA's PLM dashboard, enabling them to connect and share functionality.
- Developed cross-widget drag-and-drop using postMessage to communicate across iframe-isolated widget boundaries.
- Built and integrated a unified advanced search widget that queries and surfaces results across multiple widgets.
- Reverse-engineered ENOVIA's undocumented APIs via browser DevTools to map the platform APIs exposed to widgets.

NAS System in C – Network Storage Server

[GitHub](#)

- A lightweight Network Attached Storage (NAS) system in C for managing and accessing files over a web interface.
- Developed a custom backend server to handle file uploads, downloads, and real-time content preview in the browser.
- Designed the system to support multiple users with secure access and isolated file handling.
- Structured the application with a modular design, allowing easy extension with new features and integrations.
- Optimized performance for efficient file handling and smooth user experience during large file transfers.

MeloSynthiaAI – AI-powered Music Composition (Hackathon Award Winner)

[GitHub](#)

- Built an ML-driven system capable of generating music based on genre, instruments, and user prompts.
- Created a pipeline to package and sell generated tracks as digital artifacts, demonstrating real-world product potential.
